SUMMARY

Senior Executive – IT System / Security Engineer with expertise in 2nd and 3rd level support across systems, networks, and cloud platforms. Skilled in implementing security tools like Forcepoint DLP, Taegis XDR, SentinelOne EDR, Sophos MDR, ClearPass NAC, and BeyondTrust. Proficient in Microsoft Entra ID, Intune MDM, and hybrid AD for identity and device management. Experienced with VMware ESXi, Hyper-V, Microsoft 365 administration, Veeam, HPE 3PAR, Quorum, and RMAN backups. Strong in NGFW firewall management, patch compliance, and IT asset operations. Proven success in administering ECM Workflow, Salesforce CRM, and SharePoint to support business continuity.

EDUCATION

PONNAIYAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY, TAMIL NADU, INDIA (PRIST DEEMED University)

•B.Tech – Computer Science and Engineering
2016 - 2020

EXPERIENCE

NGI - National General Insurance Co. (PJSC)

Dubai, UAE.

Senior Executive – IT / Security Engineer

05/2025

- **Implemented and administered Forcepoint DLP** to prevent data leaks, enforce data protection policies, and secure sensitive information across all endpoints.
- **Configured and managed Taegis XDR, SophosMDR and SentinelOne EDR** for advanced threat detection, investigation, and automated incident response.
- **Deployed and monitored ClearPass NAC** to enforce secure network access control, enabling identity-based policy enforcement.
- **Managed BeyondTrust Password Safe** to secure, rotate, and audit privileged access credentials for critical infrastructure.
- **Administered Microsoft Entra ID (Azure AD)** integrated with on-premises Active Directory to manage user identities, SSO, and access governance.
- **Configured and managed Microsoft Intune MDM** for policy enforcement, application management, and device compliance on corporate laptops and tablets.
- **Managed Forcepoint NGFW firewall**, including rule creation, port forwarding, traffic inspection, and policy enforcement for secure perimeter defense.
- **Performed centralized patch management** using ManageEngine for endpoints and servers to mitigate security vulnerabilities and ensure compliance.
- **Configured, managed, and monitored Veeam Backup, HPE 3PAR, Quorum, and MSA storage systems** for backup integrity and disaster recovery readiness.
- **Executed and maintained RMAN backup operations** for Oracle databases, ensuring consistent and recoverable data states.
- **Administered and maintained Hyper-V infrastructure**, including provisioning virtual machines, resource optimization, and high availability.
- **Managed Microsoft 365 and Active Directory**, handling user provisioning, group policies, license assignment, and secure mailbox configuration.
- **Performed administration of ECM Workflow, Genesys, Salesforce CRM, and SharePoint**, ensuring platform availability, role-based access, and business continuity.
- **Provided 2nd-level technical support** for escalated Helpdesk issues involving systems, networks, and application troubleshooting.

TRAINING CERTIFICATIONS

Ethical Hacking & Penetration Testing

Certified by Emirates Institute of Finance [EIF]

Infrastructure & Cloud Security

Certified by Emirates Institute of Finance [EIF]

SKILLS

FortiGate Firewall · Forcepoint DLP · Sophos MDR · Forcepoint NGFW · Taegis XDR · SentinelOne EDR · Kaspersky EDR · ClearPass NAC · Veeam · HPE 3PAR · Microsoft Intune · Microsoft Azure · Microsoft Entra ID · Microsoft 365 · VMware ESXi · vSphere · Hyper-V · RMAN Backup · MSA · Quorum · Active Directory · GPO · DNS · DHCP · Office 365 · Google Workspace · ECM Workflow · Salesforce CRM · Genesys · NAS · RAID · SharePoint · IIS · VPN · VLANs · Virtual IPs · Routing · Port Forwarding · Security Policies · Network Security · Network Troubleshooting · Cisco · Security Events Management · System Hardening · MacOS · Aruba · Patch Management · Traffic Analysis · Disaster Recovery · Windows Server · Cloud Infrastructure · Windows 10/11 · Acronis · Ubuntu · Outlook · Uni-Fi · BeyondTrust Password Safe

KEY ACHIEVEMENTS

- **Advanced Data Loss Prevention and Endpoint Security:**

Implemented Forcepoint DLP, SentinelOne EDR, and Taegis XDR to significantly reduce data breach risks, achieving a 98% prevention rate of unauthorized data access and leakage.

EXPERIENCE

AI Jallaf Groups (Mesoft Business Solutions LLC)

Dubai-UAE

IT Infrastructure Engineer

07/2022 - 04/2024

- **Configured and managed FortiGate firewall policies**, including security policies, VLANs, VIPs, port forwarding, and event log analysis.
- **Engineered and maintained client networks, workstations, and hybrid cloud environments**, ensuring scalability and availability.
- **Managed and configured VMware ESXi and vSphere**, including hardware installation, upgrades, and virtualization management.
- **Configured and optimized Azure virtual machines and services** for performance, availability, and compliance.
- **Conducted regular system audits and implemented system hardening/security enhancements** based on evolving threat landscapes.
- **Managed RAID configurations and IIS settings** for secure web application hosting and data integrity assurance.
- **Configured VPNs and supported advanced network troubleshooting**, ensuring secure remote access and connection stability.
- **Evaluated and integrated new software and hardware solutions** to enhance operational efficiency, security, and scalability.
- **Administered DNS, DHCP, and Active Directory**, including group policies and user authentication management.
- **Implemented and maintained Endpoint Detection and Response (EDR) systems** for real-time monitoring and incident response.
- **Managed NAS-based data backups with disaster recovery policies**, ensuring retention compliance and business continuity.

Grupo Karim's (Latin Textiles & Trade DMCC)

Dubai-UAE

IT Engineer-(Contract Role)

02/2022 - 05/2022

- **Administered Active Directory**, including adding and configuring new workstations and setting up user accounts.
- **Managed VMware ESXi and vSphere infrastructure**, ensuring optimal virtual machine performance and system reliability.
- **Implemented and maintained Endpoint Detection and Response (EDR) systems**, enabling real-time threat detection and enhanced security posture.
- **Configured and optimized Azure virtual machines and cloud infrastructure** for maximum performance, reliability, and availability.
- **Conducted system audits and applied critical security enhancements** to mitigate vulnerabilities and respond to evolving cyber threats.
- **Configured and maintained FortiGate firewall**, managing security rules and network traffic controls.
- **Configured VPN solutions for remote user authentication**, ensuring secure access and encrypted connections.
- **Managed NAS-based data backups**, including creation of structured backup and recovery policies for data integrity and availability.

Global IT Search Pvt Ltd

Chennai-India

IT System Engineer & Administration

04/2020 - 09/2021
