PORTFOLIO LINKEDIN

SUMMARY

IT professional with 6+ years of experience spanning systems analysis, application support, and information security across Dubai's insurance, trading, and infrastructure sectors. Skilled in translating business and operational requirements into technical solutions across identity, endpoint, network, and application platforms, including Microsoft Entra ID, Intune MDM, Forcepoint DLP, Taegis XDR, Sophos MDR, and SentinelOne EDR. Experienced in root-cause analysis, system performance monitoring, application support (ECM Workflow, Salesforce CRM, SharePoint, Genesys), vendor coordination, and technical documentation. Track record in solution evaluation, system hardening, patch and change management, disaster recovery, and IT governance, improving reliability and operational efficiency across hybrid on-premises and cloud environments.

EDUCATION

B.Tech – Computer Science and Engineering

PONNAIYAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY, TAMIL NADU, INDIA (PRIST DEEMED University)

2016 – 2020

MOHAMED ABDULLAH KHAN

SENIOR EXECUTIVE – IT SYSTEM / SECURITY ENGINEER

EXPERIENCE

NGI – National General Insurance Co. (PJSC)

Dubai, UAE

Senior Executive – IT System / Security Engineer 05/2025 – Till Now

- **Data Loss Prevention (DLP) – Forcepoint:** Implemented, administered, and reviewed Forcepoint DLP policies across all endpoints — policy creation and tuning, data-flow analysis, data classification, policy coverage oversight, and incident handling to prevent leaks and enforce information protection controls.
- **EDR / XDR Security – Taegis XDR, Sophos MDR, SentinelOne EDR:** Led deployment and administration of endpoint detection and response policies for advanced threat detection, root-cause investigation, and automated incident response; managed policy creation, updates, access restrictions, and changes to limit unauthorized activity.
- **Deployed and monitored ClearPass NAC** to enforce secure, identity-based network access control policies.
- **Maintained BeyondTrust Password Safe**, defining privileged access policies to secure, rotate, and audit credentials for critical infrastructure.
- **Microsoft 365 / Domain Controller / Entra ID Hybrid:** Administered Microsoft Entra ID (Azure AD) integrated with on-premises Active Directory Domain Controllers in a hybrid identity setup — user provisioning, SSO, group policy, licensing, secure mailbox configuration, and access governance in line with IT security policy.
- **MDM & Patch Management – ManageEngine, Intune:** Managed centralized MDM and patching through ManageEngine and Microsoft Intune policies for corporate laptops, desktops, tablets, and Android devices — application management, device compliance, restrictions, and CVSS-driven patch prioritization to reduce vulnerabilities across endpoints and servers.
- **Email Security – Check Point & Microsoft Defender:** Administered Check Point and Microsoft Defender email security policies for inbound and outbound mail filtering, with anti-phishing, anti-malware, and anti-spam controls to protect against email-borne threats.
- **Firewall – FortiGate & FortiAnalyzer:** Administered FortiGate firewall policies (rule creation, VIPs, port forwarding, traffic inspection) and used FortiAnalyzer for centralized log analysis, event reporting, and threat investigation; also oversaw Forcepoint NGFW policy administration and perimeter defense.
- **File Server Administration:** Administered Windows file servers — shared folder structure, NTFS and share permissions through Active Directory groups, access reviews, and backup coverage for data integrity and availability.
- **Configured, managed, and monitored Veeam Backup, HPE 3PAR, Quorum, and MSA storage systems** for backup integrity and disaster recovery readiness.
- **Led a storage infrastructure migration to NetApp**, modernizing enterprise storage capacity alongside existing HPE 3PAR and Quorum platforms.
- **Deployed Acronis-based backup for Microsoft 365**, extending data protection and recovery coverage to mailbox, OneDrive, and SharePoint content.
- **Executed and maintained RMAN backup operations for Oracle databases**, ensuring consistent and recoverable data states.
- **Administered and maintained Hyper-V infrastructure**, including VM provisioning, resource optimization, and high availability.
- **Supported application administration and system integration across ECM Workflow, Genesys, Salesforce CRM, and SharePoint**, ensuring platform availability, role-based access, and business continuity.
- **Performed root-cause analysis and 2nd-level technical support for escalated Helpdesk issues** across systems, networks, and applications.
- **Currently supporting deployment of AI agent server infrastructure**, evaluating integration, hosting, and security requirements for enterprise AI agent workloads.
- **Reviewed central bank security report findings** and tracked remediation of identified gaps through to closure.
- **Configured Azure Information Protection (AIP) labeling**, including sensitivity labels and auto-labeling rules to classify and protect sensitive corporate data.

CERTIFICATIONS

Ethical Hacking & Penetration Testing
Certified by Emirates Institute of Finance [EIF]

Infrastructure & Cloud Security
Certified by Emirates Institute of Finance [EIF]

Application Security
Certified by Emirates Institute of Finance [EIF]*

SKILLS

SECURITY

FortiGate Firewall · Forcepoint DLP · Forcepoint NGFW · Sophos MDR · Taegis XDR · SentinelOne EDR · Kaspersky EDR · ClearPass NAC · Microsoft Defender · Check Point · Azure Information Protection (AIP) · Microsoft Azure · Security Policies · Network Security · Security Events Management · CVSS Vulnerability Management · System Hardening · Patch Management · Traffic Analysis · Disaster Recovery · BeyondTrust Password Safe

ADMINISTRATION

Systems Analysis · Solution Design · System Integration · Application Support · Root Cause Analysis · Impact Assessment · IT Governance · Change Management · Technical Documentation · Vendor Management · System Performance Monitoring · Automation · Veeam · HPE 3PAR · Microsoft Intune · Microsoft Azure · Microsoft Entra ID · Microsoft 365 · VMware ESXi · vSphere · Hyper-V · RMAN Backup · MSA · Quorum · NetApp · Active Directory · GPO · Office 365 · Exchange Online · Google Workspace · ECM Workflow · Salesforce CRM · Genesys · NAS · RAID · SharePoint · IIS · MacOS · Windows Server · Cloud Infrastructure · Windows 10/11 · Acronis · Ubuntu · Outlook

NETWORKING

DNS · DHCP · VPN · VLANs · Virtual IPs · Routing · Port Forwarding · Network Troubleshooting · Cisco · Aruba · UniFi

KEY ACHIEVEMENTS

Advanced Data Loss Prevention & Endpoint Security
Rolled out Forcepoint DLP, Taegis XDR, SentinelOne EDR, and Sophos MDR together — cutting unauthorized data access and leakage by 98%.

Backup Optimization & Recovery Readiness
Kept backups rock-solid across Veeam, RMAN, HPE 3PAR, and Quorum — 100% success rate, RTO down 40% — then extended coverage with a NetApp migration and Acronis-protected Microsoft 365.

PROJECTS & AUTOMATION

Net-Monit
Personal network-monitoring project — tracks device/service availability and alerts on outages.

PC Admin Tools
Remote administration tool for performance fine-tuning, disk cleanup, network troubleshooting, and other basic PC troubleshooting operations.

Scripting
Automation scripts for repetitive IT administration and system-management tasks.

EXPERIENCE

Al Jallaf Groups (Mesoft Business Solutions LLC) — Dubai, UAE

IT Infrastructure Engineer — 07/2022 – 04/2025

- **Firewall – FortiGate:** Configured and managed FortiGate firewall security policies, including VLANs, VIPs, port forwarding, and event log analysis.
- **Engineered and maintained client networks, workstations, and hybrid cloud environments**, ensuring scalability and system availability.
- **Data Loss Prevention (DLP):** Implemented and monitored DLP policies to prevent unauthorized data leakage and enforce information protection controls across endpoints, supporting data classification and incident review.
- **EDR / XDR Security:** Implemented and maintained EDR/XDR security policies for real-time monitoring, threat detection, alert investigation, and incident response.
- **Microsoft 365 / Domain Controller / Entra ID Hybrid:** Administered Active Directory Domain Controllers integrated with Entra ID (Azure AD) and Microsoft 365 in a hybrid setup — DNS, DHCP, group policy, user authentication, SSO, and licensing.
- **Email Security – Check Point & Google Workspace:** Administered Check Point and Microsoft Defender email security policies and managed Google Workspace email, user mailboxes, and security settings to protect against phishing, malware, and spam.
- **File Server, RAID & IIS:** Managed file servers, RAID configurations, and IIS settings — shared folder permissions, secure web application hosting, and data integrity.
- **Managed and configured VMware ESXi and vSphere virtualization infrastructure**, including hardware installation, upgrades, and platform management.
- **Configured and optimized Azure virtual machines and services** for performance, availability, and compliance.
- **Conducted system audits and impact assessments**, implementing system hardening and security enhancements based on evolving threat landscapes.
- **Configured VPNs and performed advanced network troubleshooting and root-cause analysis**, ensuring secure, stable remote access.
- **Evaluated and integrated new software and hardware solutions**, supporting technical solution assessment to enhance operational efficiency, security, and scalability.
- **Managed NAS-based data backups and disaster recovery policies**, ensuring retention compliance and business continuity.
- **Managed Microsoft Intune device policies** for laptops and desktops, covering device compliance, application management, and security configuration.

Grupo Karim's (Latin Textiles & Trade DMCC) — Dubai, UAE

IT Engineer – Contract Role — 02/2022 – 05/2022

- **Administered Active Directory**, including workstation configuration and new user account provisioning.
- **Managed VMware ESXi and vSphere infrastructure**, ensuring optimal virtual machine performance and system reliability.
- **Rolled out and maintained EDR security policies**, strengthening real-time threat detection and overall security posture.
- **Deployed and tuned Azure virtual machines and cloud infrastructure** to maintain strong performance, reliability, and availability.
- **Ran regular system audits and applied targeted security enhancements** to close vulnerabilities and keep pace with evolving cyber threats.
- **Maintained the FortiGate firewall**, managing security rules and network traffic controls.
- **Configured VPN solutions for remote user authentication**, ensuring secure, encrypted connections.
- **Administered NAS-based data backups**, designing structured backup and recovery policies to protect data integrity and availability.
- **Supported Taegis XDR threat detection and response** alongside endpoint security monitoring and incident investigation.
- **Configured and maintained network infrastructure**, including VLANs, DNS, DHCP, and firewall rule management to ensure secure and stable connectivity.

Global IT Search Pvt Ltd — Chennai, India

IT System Engineer & Administration — 04/2020 – 09/2021
IT Support Intern · Onsite — 09/2019 – 02/2020
